

BROOKS, RICE AND BAXTER.

The Brooks rice at Little Rock will find the proposed election of Baxter from office a bootless task; so palpably profited that the effort will hardly be made. Little Rock politicians and newsmen would have given no credit to the story that such a purpose was gravely entertained if Brooks' character was not so thoroughly well understood. The ex-preacher is the most daring, reckless and desperate adventurer in Arkansas, and Rice, the ex-convict, whose fate it is of Brooks, is Brooks' trusted adviser. It is the character and desperate political fortunes of these men that excite apprehensions of danger at Little Rock and give an air of probability to statements affecting the conduct of warlike factions.

The Vicksburg Herald says the bar practicing in the supreme court of the United States of Mississippi, and especially the bar at Jackson, learning of his intention to resign, called Judge Sumner, a few days ago, and earnestly and solemnly protested against it. The judge is a Kentuckian by birth, and a gentleman of legal education, devoted to his profession. He moved to Mississippi in early manhood. From there he came to the supreme bench in 1859, and has since, for a few years, when he was professor of law in the university of Louisville, he has been a citizen of that state, and has, time and again, aided in shaping and moulding her laws and the spirit of her legislation. His career has been a long one, and he has been a most successful lawyer, and a most successful politician. Upon it the bar has passed its opinion.

Is the editor of the Cincinnati Commercial a Modoc. In a recent issue he talks as if he was. After studying the census table six months ago, he wrote a remarkable fact that sixteen and a half millions of our population, or thirty-eight and a half millions, are either of foreign birth themselves, or in some degree removed from foreigners. "Whereupon the St. Louis Democrat asks very properly: "And the twenty-two millions who are neither of foreign birth themselves nor in any degree removed from foreigners—where did they come from?"

This convention of governors to be held at Atlanta on the twentieth instant, for the purpose of discussing the question of inland navigation, will be a success. The following governors have signified their intention of being present: Hendricks, of Indiana; Woodson, Missouri; Walker, Virginia; Jacobs, West Virginia; Brown, Tennessee; Lewis, Alabama; Moses, South Carolina; Noyes, Ohio; Carpenter, Texas; Washburne, Wisconsin; Beveridge, Illinois; Cook, District of Columbia, and others.

The gallant General John B. Gordon, senator from Georgia, at the reception given him in Charleston, recently, gave the following sentiments at the close of his eloquent speech: "The honor of both armies is gone, but the principle and backed their conviction with their lives. Let both be duly honored."

Hon. JAMES BROOKS was a thirty newspaper man. He left, by will, to his wife and children a million and a quarter dollars.

HENRY A. WISE is to be the Republican candidate for governor of Virginia.

VARIETIES.

The sound of the new spring boot is heard in the church aisle. A number of communists have been arrested at Geneva, in Switzerland. Early garden state is showing signs of coming, owing to a warm sun and the heavy dew.

Farmers are waiting for the weather to moderate sufficiently to permit them to turn up their winter sowing in the cornfields.

It is said that several of the Modocs who were shot in the late engagements with our troops, died before their share of the government blankets and ammunition could be got to them.

There is something interesting in observing two women looking disdaintly at each other, but when two old ladies whose front teeth are gone, and who, of course, the effect is very depressing.

An Irish philosopher asks in his favorite journal the following question: "Would it be better to have a pretty girl than a pretty walk with a pretty girl than a pretty walk with a pretty girl?"

The imports of iron of all descriptions in France in the first two months of this year were forty thousand tons, or the corresponding period of 1872 the imports did not exceed twenty-three thousand tons.

The editor of a "literary" paper out west says that George Eliza is the pseudonym of Mrs. Rebecca Harding Davis. Let Buffalo Bill be a little more careful in that follow and let his day-light into his brain.

A new style of rug is made of what looks like a green cloth, which when rubbed with a damp cloth gives a red pigment, and when rubbed with a dry cloth, it gives a blue pigment. It is a Chinese invention.

The late John R. Thompson, the western poet, according to the Baltimore American, was a man of several years in the future, during the whole of his existence—the leading writer, if not the editor, of the well-known London Standard. He wrote for it actively and industriously.

At a concert recently given in Paris by Messrs. Alard and Paganini, the latter, while playing the violin, was suddenly seized with a fit of the blues, and he was obliged to stop.

French journals tell a story about a man named Debel, and which he calls a "legitimate" shape like a ham; the mutton is a large carrot, and the keys are made of iron, and are covered with a bunch of radishes.

It is claimed by an authority on horse breeding in a recent issue of the Standard that the greatest nutrition and the highest vitality produce the female, while the want of it in the male gives rise to the defect to the male. The theory is startling. If nutrition at a very early stage of development does the work of the male, it is well enough for our breeders to understand the fact. But will the theory hold water?

If any old fellow, what are your pills? said a witty American man, quizzing another American. "Conventional," my father was conventional," he replied. "And what is your religion?" continued the other. "Protestant—my father was Protestant," he answered. "And why are you a bachelor?" said the other. "Because my father was a—oh confound it! don't bother me with your silly questions!"

There is one novelty which has been introduced into the London streets which can hardly be called an improvement. Some chemical is now dissolved in the water with which the streets are sprinkled. The object is to prevent the water from freezing so quickly, and thus to render it possible to do with less frequent watering of the streets.
